"Philosophical humor of the highest order." Kirkus Reviews Time itself is threatened and it's up to the History Monks to save it in this hilarious installment in Sir Terry Pratchett's bestselling Discworld series. Everybody wants more time. Which is why, on Discworld, only the experts can manage it: the venerable Monks of History who store it and pump it from where it's wasted, like underwater (how much time does a codfish really need?) to places like cities, where busy denizens lament never having enough of it. While everyone talks about slowing down, one young horologist is about to do the unthinkable. He's going to stop. Well, stop time, that is, by building the world's first truly accurate clock. Which means esteemed History Monk Lu-Tze and his apprentice Lobsang Ludd have to put on some speed to stop the timepiece before it starts. For if the Perfect Clock starts ticking, time as we know it will end. And then the trouble will really begin... The Discworld novels can be read in any order but Thief of Time is the final book in the Death series. The collection includes Mort, The Reaper Man, Soul Music, Hogfather, Thief of Time.
