ISBN-13: 9780593381151

This young adult adaptation of acclaimed geochemist and geobiologist Hope Jahren's highly respected nonfiction work is the perfect book for those interested in learning about climate change and how they can contribute to creating a more sustainable future. Hope Jahren illuminates the science behind key inventions, clarifying how electricity, large-scale farming, and automobiles have both helped and harmed our world. She explains the current and projected consequences of unchecked global warming, from superstorms to rising sea levels, resulting from the unprecedented amounts of greenhouse gases being released into our atmosphere. The links between human consumption habits and our endangered existence are very real. Still, Jahren maintains that our ever-broadening science-based knowledge can help us counter these effects. The eye-opening information in The Story of More will help readers understand the path needed. If we collectively make informed choices now, Jahren reassures, our future can be as bright as we imagine it can be.
