Costing Based and Account-Based Profitability related configurations are provided in this document: Define Operating Concern [KEA0] Account based CO-PA: Costing based CO-PA: Costs and Revenue elements are used to transfer data from FI to Account based CO-PA. In costing-based CO-PA, you define "value fields" in which to store your data for With SAP Simple Finance, account based COPA has been simplified The aim of this guide is to provide required configuration (SPRO) steps maintained in Profitability Analysis (CO-PA) in SAP Controlling module. The Value Fields are used to mapped the costs to the of G/L accounts and SD condition types etc. FI and Account based CO-PA both are reconciled in S4 HANA as before ide whether costing or account-based COPA is best for your business requirements, and understand how to configure the software for a successful implementation. Step-by-Step Instructions Follow process-oriented steps, learn how to configure master data so it can be transferred to COPA from other SAP components, create reports, and define revenues according to value fields and costing-based valuation approaches, both of which you can define yourself. This includes both units you want to evaluate (characteristics) and the categories in which you analyze values. It guarantees you access at all times to a complete, short-term profitability report. Two forms of Profitability Analysis are supported: costing-based and account-based. Account-based Profitability Analysis is a form of profitability analysis organized in accounts and using an account-based valuation approach Features. Same as before. No reconciliation problem. In the application component CO-PA, you can define your master data, the basic structures of this form of profitability analysis. Start with the Account Based Copa AnilFree download as PDF File.pdf), Text File.txt) or read online for free. Costing-based Profitability Analysis is the form of profitability analysis that groups costs SAP COPA ConfigurationFree download as PDF File.pdf), Text File.txt) or read online for free. This is a step by step SAP COPA configuration document Account-Based COPA (Controlling Profitability Analysis) is a critical component of SAP S/4 HANA Finance and offers significant advantages over the traditional costing-based SAP CO-PA Configuration (Profitability Analysis) With this E-Bite, you'll learn how to configure costing-based Profitability Analysis (CO-PA) in SAP Controlling.
