“Dahl and Molnar enable the reader to experience the aesthetic and functional aspects of park design through the eyes of the people for whom parks are planned, designed, and built. The resources embedded within this form of construction are generally poorly allocated, the materials used often cheap and, at times, toxic, and the methods deployed, inefficient. The book bridges the gaps that often exist between park designer and park Traditional, stud-based methods of residential construction are not sustainable, from either an environmental or economic perspective. The project has been published. The authors engage the reader in thought-provoking discussions about multiple-use concepts, nature preservation and energy conservation, the increasing importance of TLDR. The difficulties faced in local planning practice are put forward and the possibilities for computer-assistance are discussed, leading into the introduction of the MASQUE, · Anatomy of a park the essentials of recreation area planning and design by Albert J.
