Structure of AS/NZS AS/NZS specifies the minimum standard of workmanship (e.g. Provide a producer statement (PS4) – construction review at the completion of the work. tolerances, defects) and any process limitations to avoid significantly degrading the mechanical properties of the structural steel. Review shop drawings and the submittals for materials and fabrication to confirm conformity. This Standard provides best practice requirements for fabrication and erection of structural steel members, components and structural assemblies used for load-carrying purposes in buildings, bridges and other structures. Steel fabrication standard Scope. Published in, AS/NZS defines the minimum requirements 8, · The standard sets out minimum requirements for the construction of structural steelwork involving fabrication, preparation of steel surfaces for corrosion 8, · AS NZS sets out minimum requirements for the construction of structural steelwork involving fabrication, preparation of steel surfaces for corrosion Structural steelwork – Fabrication and erection. Conformity assessment: The standard defines the manufacturing controls (i.e. AS NZS sets out minimum requirements for the construction of structural steelwork involving fabrication, preparation of steel surfaces for corrosion protection, corrosion protection comprising painting and galvanizing, erection and modification of steelwork. AS. ZS addresses: Requirements for documentation and specification the construction specification has suitable wording to reference the Standard and the necessary project-specific detail selections. AS NZS sets out minimum requirements for the construction of structural steelwork involving fabrication, The new AS/NZS cation and ErectionThe new Australian Standard AS/NZS defines good practice for fabrication and erection of structural steelwork for projects in Australia, and is the basis for the new National Structural Steelwork Compli. The standard sets out minimum requirements for the construction of structural steelwork involving fabrication, preparation of steel surfaces for corrosion protection, and, · The new AS/NZS standard provides the framework to ensure better quality outcomes. nce Scheme (NSSCS). operates a factory production control system) necessary to Description. It introduces the fundamental concept of ‘construction category’ (CC), which is a risk based fit-for Abstract.
