It includes dimensional interchangeability requirements and certain design features to facilitate ASME B of the bearing frame. A mechanical seal B, B, B, B ASME B Specification for Horizontal End Suction Centrifugal Pumps for Chemical Process Current issue dateThe data sheet is ASME BThis Standard is a design and specification standard that covers metallic and solid polymer centrifugal pumps of horizontal, end suction singleDigital Revisions have also been made to further improve the reliability of the B pumps. B will be withdrawn. ASME standard B on solid polymer pumps has been merged into B due to the many similarities of the two standards. corrosion resistance to the pumped fluid that is equal to, or greater than, that of the casingCorrosion Allowance Constant Level Oiler ASME B [Revision and Consolidation of ASME B (R) and ASME BM (R)] Specification for Horizontal End Suction Centrifugal Pumps for Chemical Process AN AMERICAN NATIONAL STANDARD Two Park Avenue New York, NY USA This is a preview of "ASME B" also been made to further improve the reliability of the B pumps. ASME B (Revision of ASME B Nomenclature for pump sizes added to align with sizes identified in B Default performance test acceptance grade revised to reflect the new HI/ISO performance test standard. ASME standard B on solid polymer pumps has been merged into B due to the many ASME B [Revision and Consolidation of ASME B (R) and ASME BM (R)] Specification for Horizontal End Suction Centrifugal Pumps for ASME B (Revision of ASME B) Specification for Horizontal End Suction Centrifugal Pumps for Chemical Process. The proper oil level for the nonoperating pump shall be indicated on the outside of the bearing frame. New data sheet common to B and B developed and added ASME BThis Standard is a design and specification standard that covers metallic and solid polymer centrifugal pumps of horizontal, end suction single stage, centerline discharge design. Reference now made to API practices for mechanical seal configurations, and cooling and heating plans. Reference is now made to API practices for mechanical seal configurations and cooling and heating plans.
