Cdo documentation pdf

This document provides a user guide for the Climate Data CDO is a collection of command line Operators to manipulate and analyse Climate and NWP model Data. Supported data Introduction TheClimateDataOperators(CDO)softwareisacollectionofmanyoperatorsforstandardprocessingofclimateandforecastmodeldata The Climate Data Operators (CDO) software is a collection of many operators for standard processing of climate and forecast model output. CDO can also be used to analyze gridded data not related to climate science. Supported data formats are GRIB 1/2, netCDF 3/4, SERVICE, Operator catalog. CDO provides more than operators, including Climate Data Operators¶ CDO is a collection of command line Operators to manipulate and analyse Climate and NWP model Data. CDO was developed to have the same set of Climate Data Operators (CDO) A collection of command-line operators to manipulate and analyze climate and numerical weather prediction data; includes support for netCDF-3, netCDFand GRIB1, GRIB2, and other formats. The operators include simple statistical and arithmetic functions, data selection and subsampling tools, and spatial interpolation. The operators include simple statistical CDO User Guide e ebook download as PDF File.pdf), Text File.txt) or read book online for free. Documentation; Overview. The Climate Data Operator (CDO) software is a collection of many operators for standard processing of climate and forecast model data. Operator listIntroduction. The operators include simple statistical and arithmetic functions, data selection and subsampling tools, and spatial interpolation The Climate Data Operators (CDO) software is a collection of many operators for standard processing of climate and forecast model output.
