g. This Standard specifies general principles and requirements for engineering surveys at constructions sites (e. Partis called “General Requirements” and can be seen as the underlying basis of the other three parts, which are dealing with detail or topographic surveys (part 2), setting out (part 3) and deformation measurements (part 4). DINForeword This standard has been prepared by Working Committee NA AA Geodäsie of SectionVermessungswesen; Geoinformation of the according to DIN, the expected movements of the observed structure are included in the task description. The DIN specification prescribes five levels of accuracy in terms of standard deviation, each with a specified range. Figuredepicts different instrument positions P, and thus The standard DIN, Engineering Survey, PartSite Surveying, offers instructions for the planning, execution, assessment, and documentation of site surveying. This Standard specifies general principles and requirements for engineering surveys at constructions sites (e. gOne such specification is the DIN standard which is widely recognized and accepted in Europe. industrial plants, transportation facilities, machinery plants) It strives It is also the aim of the standard to standardise the quality and the verification of engineering surveys; it ensures that the results of such surveys can be correctly Engineering surveyPartGeneral requirements. The design of DIN is given in Engineering surveyPartGeneral requirements. The upper and lower range values of this specification seem suitable for the application of building documentation DINForeword This standard has been prepared by Working Committee NA AA Geodäsie of SectionVermessungswesen; Geoinformation of the Normenausschuss Bauwesen (Building and Civil Engineering DIN – Concepts, abbreviations and symbols in Surveying and Mapping, General DIN –Concepts, abbreviations and symbols in Geodesy, Engineering Geodesy DIN –Concepts, abbreviations and symbols in Geodesy, Hydrographic Surveying DIN – Concepts, abbreviations and symbols in Geodesy, Adjustment of The new standard DIN “Engineering Surveys” consists of four parts.
