If “good enough” PDF sharing isn’t enough for your site and organization, consider You can do it by using the Export as PDF tool like this: Your document link (example): Uses HTML5 to display PDF files directly in the browser. Next, open the playground and generate the embed code Please note that credentials are valid for one domain only so if you have multiple sites, you’d need a different set of credentials for them. You can get around this It does take a few extra steps to use the View SDK. Go to and create a new set of credentials for your site. embedded: if set to You can embed a PDF viewer in HTML using HTML tags quickly, easily, and at no cost. is a Portable Document Format (PDF) viewer that is built with is community-driven and UPDATE (1/): The Chrome browser on Android no longer supports PDF embeds. The document viewer (link is bad now, but the instructions below work) has two parameters: url: the URL of the document.
