Étape 1 - How to Get Tidal App on Galaxy Watch

To begin using Tidal on your Galaxy Watch, you'll need to download and install the Tidal app. Follow these steps to get started:
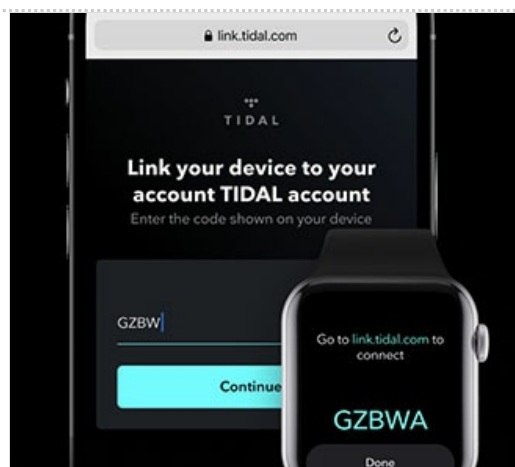

Step 1: Open the Galaxy Wearable App
First, open the Galaxy Wearable app on your smartphone. This app allows you to manage and install applications on your Galaxy Watch.

Step 2: Find and Install the Tidal App
In the Galaxy Wearable app, navigate to the "Galaxy Store" section. Search for the Tidal app using the search bar and select it from the search results. Tap on "Install" to begin the installation process.

Step 3: Sign in to your Tidal Account
Once the Tidal app is installed on your Galaxy Watch, open it, and sign in using your Tidal account credentials. If you don't have a Tidal account yet, you can create one directly from the app.

Étape 2 - How to Use and Control Tidal on your Galaxy Watch

Now that you have the Tidal app installed on your Galaxy Watch, let's explore how to control and enjoy your favorite music.

Play/Pause Music
To play or pause music on your Galaxy Watch, please open the Tidal app and browse through your music library. Then select a song or playlist and tap the play/pause button on your watch to control the playback.
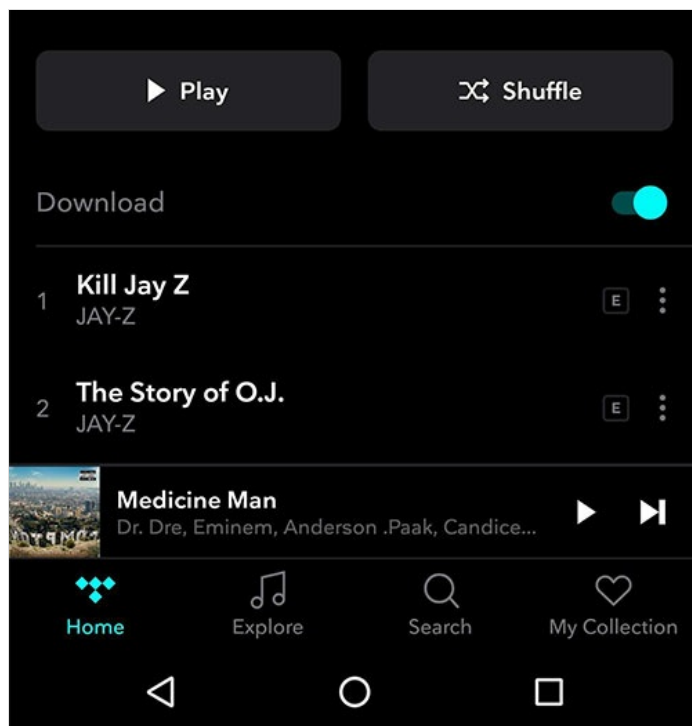

Skip to Next/Previous Track
If you want to skip to the next or previous track while listening to Tidal on your Galaxy Watch, use the dedicated buttons or touchscreen controls on your watch. These buttons allow you to navigate through your music without needing to take out your smartphone.

Adjust Volume
To adjust the volume while listening to Tidal on your Galaxy Watch, use the volume controls on your watch. These controls allow you to increase or decrease the volume based on your preferences.

Add Tracks to Favorites
While listening to a song or playlist, you might come across a track you particularly enjoy. To add it to your favorites, simply tap the appropriate button on your Galaxy Watch. This feature makes it easier to access your preferred tracks later.

Étape 3 - How to Listen on Galaxy Watch with Tidal Offline

One of the advantages of using Tidal on your Galaxy Watch is the ability to listen to music offline. This feature comes in handy when you don't have access to a stable internet connection or want to save on mobile data.

Downloading Music for Offline Listening
To download music for offline listening, open the Tidal app on your Galaxy Watch and browse through the available songs and playlists. When you find a track or playlist you'd like to listen to offline, tap the download button next to it. The music will be downloaded and stored on your watch for offline playback. Or, you can use a third-party tool. We recommend you use AudFree Tidal Music Converter. It is professional to download Tidal music as permanent local files and convert Tidal music to MP3, WAV, and other Galaxy Watch-supported formats. Afterward, transfer Tidal downloads to your Galaxy Watch via a USB. So, you can play downloaded Tidal music on Samsung Galaxy Watches and other devices at any time you like.

Accessing Offline Music on Galaxy Watch
Once you've downloaded music for offline listening, you can access it anytime, even without an internet connection. Open the Tidal app on your Galaxy Watch and go to the "Offline" section. Here, you'll find all the music you've downloaded, ready to be played.
