Commentaires

Introduction

Although Apple Music allows you to create a new music playlist and import your local files to it as you like, Spotify doesn't let you achieve Spotify to Apple music directly. That's because all Spotify songs are limited by their format. In this case, a Spotify music converter can be your help. That's why you meet TunesKit Music Converter for Spotify here.

As a powerful Music Converter for Spotify, TunesKit [Spotify to MP3 downloader](#) can easily and completely convert all Spotify songs and playlists to MP3, AAC, FLAC, or WAV which are supported by Apple Music. When Spotify music is successfully converted to these common audio formats, you can freely transfer songs from Spotify to Apple Music.

Now you are suggested to download the free trial version of this smart Spotify converter before following the tutorial below.

Matériaux

Outils

Étape 1 - Step 1. Add Spotify Songs or Playlists

Launch TunesKit [Spotify Playlist Downloader](#) on Windows or Mac computer. Drag any track or playlist from Spotify and drop it into the TunesKit conversion interface. Or copy and paste the Spotify music links to the search box.

Étape 2 - Step 2. Adjust Output Preferences

Go to "menu bar > Preferences > Convert" to select an output format for your Spotify songs, adjust conversion speed, output path, bit rate, sample rate, etc.

Étape 3 - Step 3. Download Spotify to MP3

Click the "Convert" button to start converting Spotify music to Apple Music compatible formats. After conversion, click the Converted button to locate the converted Spotify music files from your computer.

Étape 4 - Step 4. Move Spotify Playlist to Apple Music

Now open iTunes, go to the Menu bar, and find "File > Library > Import Playlist" to import the converted MP3 Spotify playlists from the local drive.
