Click the "Convert to HTML" button to start the conversion. When the status change to "Done" click the "Download HTML" button I can't find a way to get the token download URL when I write a file to Storage from a Cloud Function (because I can't find a way to tell the front end that a file has written to Storage), but what works for me is to write a file to a publicly available URL, write the publicly available URL to Firebase, then when my Angular front end gets the1 Correct answer. How do you upload your file to the -server? But instead of attaching as a document, I'd like to create a link to the document. You upload the file to your -server and then use its URL in your link, just like with any other file. Solved: I have a pdf document that I created. With our Convert PDF to URL feature, you can effortlessly transform your PDF files into interactive and accessible URLs. Click the "Choose Files" button to select your PDF files. Can someone help with this? Say goodbye to bulky attachments and hello to a more Upload a document from your computer or cloud storageAdd text, images, drawings, shapes, and moreSign your document online in a few clicksSend, Use this free online tool to convert links to PDF. Just enter the URL, adjust the formatting settings, and click convert to download PDF using a link How to Convert PDF to HTML?
