Note: The accept attribute can only be used with input type="file">. To make it allow only pdf files, we set accept attribute to the types that file input should accept var myFile=""; \$('#file').on('change',function(){ myFile = \$('#file').val(); (myFile); var upld = (!).pop(); if(upld=='pdf'){ alert("File uploaded is pdf") }else{ Below code worked for me:fileInput type="file" id="avatar" accept="application/pdf,application/msword,application/ lformats To get the HTML file input form element to only accept PDFs, you can use the accept attribute in modern browsers such as Firefox 9+, Chrome+, Opera+ and IE10+ like such. You can string together multiple mime types with a comma For accepting only PDF and XLS files, you can set the accept attribute to "application/pdf, application/ -excel". Note: The accept attribute can only be used with file">. This will restrict the file input to only accept files with MIME types matching these values The accept attribute specifies a filter for what file types the user can pick from the file input dialog box. The accept attribute specifies a filter for what file types the user can pick from the file input dialog box. The "accept" attribute allows you to specify the MIME types of files that the user can select. Here's an example of how you can modify your HTML code to only accept PDF files The MIME type for PDF files is "application/pdf". Tip: Do not use this attribute as a validation tool In this script, the accept attribute is set to allow only PDF and Word document files for an input field with the id "dynamicFileInput." This can be useful when you want to adjust the accepted file types based on certain conditions or user interactions Yes, you can restrict the file input type to only accept PDF files by adding the "accept" attribute to the input element. TipMissing: pdf Yes, you can restrict the file input type to only accept PDF files by adding the "accept" attribute to the input element. The "accept" attribute allows you to specify the MIME In this example, we create file input using type="file" attribute.
