Sect IS/ISO Reciprocating Internal Combustion Engine Driven Alternating Current Generating Sets, Part Emergency Power Supply to Safety Services by Bureau of This Indian Standard (Part) which is identical with ISO 'Reciprocating internal combustion engine driven alternating current generating sets – Part ISO, Reciprocating internal combustion engine driven alternating current generating sets – Part Alternating current generators for generating sets IEC ISO (E) IEC, Secondary cells and batteries containing alkaline or other non-acid electrolytes – Secondary sealed cells and batteries for portable applications – Part Nickel-Cadmium Terms and definitions For the purposes of this document, the terms and definitions given in ISO to ISO and the following Applications that use on-site generation in lieu of a utility electricity supply, typically where utility power is not available. Peak shaving and rate curtailment. This document applies to generating sets driven by reciprocating internal combustion (RIC) engines for emergency power supply to safety services. This document applies, for ISO Standard for reciprocating internal combustion engine driven alternating current generator sets. Application: kVA generator powers the dockside rubber tyred gantry cranes. Cranes lift capacity istons and can move at feet per minute It establishes the special requirements for the performance, design and maintenance of generating sets used in these applications referred to previously and takes into account the provisions of ISO to ISO and ISO Designator of Legally Binding Document: IS/ISO Title of Legally Binding Document: Reciprocating Internal Combustion Engine Driven Alternating Current Generating Sets, Part Emergency Power Supply to Safety Services Number of Amendments: Equivalence: ISO Superceding: Superceded by: LEGALLY BINDING DOCUMENT ISO Reciprocating internal combustion engine driven alternating current generating sets – Part Application, ratings and performance ISO Reciprocating internal combustion engine driven alternating current generating sets – Part Engines ISO Reciprocating internal combustion engine driven Defines application, ratings and performance of generator sets.
