With the close of the fiscal year, Rwanda has also made progress in seeds supply self-sufficiency, including maize, aim to increase the maize production and maximize the production potential. The farmers are invited at the time of demo plot establishment, maintain frequent follow up activities The CREATE Rwanda project aims to increase maize productivity and establish linkages from farmers, to processors and to HEINEKEN's operating company BRALIRWA It wanted to examine the effect of maize value chain on production increment, investigate the effect of maize value chain on quality of output, determine the effect of maize value For instance, in Africa,% of maize production designated for food consumption by smallholder farmers does not generate any cash income for them. It has been funded by the Netherlands Ministry of Foreign Affairs (MinBuZa), Heineken International and IFC Rwanda and most parts of sub-Saharan Africa face severe challenges of increasing maize productivity, which has direct consequences on food security. These challenges have led to public policies focusing on finding the cost-effective strategies of boosting maize production With the close of the fiscal year, Rwanda has also made progress in seeds supply self-sufficiency, including maize, soybean and wheat, and has been able to end all subsidies on imported seed. Additionally, in A study was conducted in Rwanda at Nyakiliba sector and Gashora sector located in Birunga and Central Bugesera agro-ecological zones, with the objectives of (1) determining factors influencing In Rwanda, NDVI-based studies integrating biotic, abiotic, and socio-economic factors that affect maize productivity are scanty and deserve focus. This study aimed at determining yield gap and devising appropriate strategies for managing maize yield gaps to ensure food security in Rwanda and value addition in different agricultural value chains. This is one among many other steps towards The CREATE Rwanda project aims to increase maize productivity and establish linkages from farmers, to processors and to HEINEKEN's operating company BRALIRWA (Heineken Group). and value addition in different agricultural value chains.
