Mcelreath statistical rethinking pdf

This unique computational This course teaches data analysis, but it focuses on scientific models first. It covers from the basics of regression to multilevel models. We will use Bayesian data analysis to connect scientific models to evidence Full lecture playlist: Statistical Rethinking Playlist> Note about slides: In some browsers, the slides don't show correctly. We will prioritize conceptual, causal models and precise questions about those models. If points are missing from plots, download the slides PDF instead of viewing in browser Statistical Rethinking: A Bayesian Course with Examples in R and Stan builds your knowledge of and confidence in making inferences from data. The author also discusses measurement error, missing data, and Gaussian process models for spatial and network Statistical Rethinking: A Bayesian Course with Examples in R and Stan builds your knowledge of and confidence in making inferences from data. Reflecting the need for even minor programming in today's model-based statistics, the book pushes readers to perform step-by-step calculations that are usually automated. The unfortunate truth about data is that nothing much can be done with it, until we say what caused it.
