For PDF documents this results in the following Pandoc options set by default Learn how to create PDF output with Quarto using different formats and options. There's also the list of LaTeX variables for Pandoc Resources for learning more. The above example will use the lualatex PDF engine with some specific options, rather than the quarto use template nrennie/PrettyPDF. To use the extension in an existing project without installing the template filequarto install extension nrennie/PrettyPDF. Quarto uses KOMA Script document classes by default for PDF documents and books. The two available examples are Adelle pdf and Gentoo pdf. Quarto's built-in PDF compilation engine handles running LaTeX multiple times to resolve index and bibliography entries, and also performs automatic Though there are some suggested workaround for using r-code in yaml in this discussion on Github, but using quarto\_render to control output filename seems the easiest option in Quarto is an open-source scientific and technical publishing system that allows you to combine text with code to create fully reproducible documents in a variety of formats Starting in Quarto, we support rendering of PDF documents that include SVG files, automatically converting them to PDF images if rsvg-convert is available on the system A Quarto format for compact PDF documents. The Quarto documentation for PDFs covers the basics of creating PDFs in Quarto and also lists all the available PDF options. Good for short reports, homework assignments, etcDocument Class. Note that you will need to update the output format of your file to format: PrettyPDF-pdf to enable use of the extension The code above will result in nine PDF files. Quarto PDF Engine. See examples of title, author, date, numbering, fonts, and more for PDF documents You can use the pdf-engine and pdf-engine-opts to control the PDF engine that Quarto uses to compile the LaTeX output into a PDF. For example: title: "My Document" pdf-engine: lualatex pdf-engine-opts'--no-shell-escape--halt-on-error'. *KOMA-Script classes are drop-in replacements for the standard classes with an emphasis on typography and versatility.*
