C. The length around a shape What is surface area? Calculate the surface area of a cylinder with a height of cm and a circumference of cm Calculate the total surface area of the triangular prism shown below Surface Area Practice Chapter Test Answer Section (ii) cm the area of the circular ends (iii) the surface area Give the answers correct the curved surface area of the cylinder correct to 1 decimal place A water tank is cylindrical in shape. A. The area of all the surfaces of a D shape What is area? am^2 bm^2 cm^2 dm^2 Calculate the area to the nearest square inch. Choose the best answer Which Math Unit Surface Area Practice Booklet Area Review Draw a picture to illustrate each of the following problems. ain^2 bin^2 cin^2 din^2 What is the area of this The height of the cylinder is cm . Therefore, Surface Area Practice Chapter Test Multiple Choice Identify the choice that best completes the statement or answers the question. Write with CHAPTER PRACTICE TEST Perimeter, Area, Volume, and Surface Area For problems 4, match each question to its answer What is perimeter? B. The number of cubes that fit inside a shape What is volume? What is the surface area of the cylinder? If necessary, round to one decimal place. Record your answer to the nearest tenth if necessary Unit - Surface Area and Volume Test Copyright © the polyhedron given below, how many vertices, edges and faces are there? Surface area of prism perimeter of base \cdot height area of two bases (\dots) in The surface area of the prism is square inches. If it has a m radius and a height of fm , find the area of the sheet metal needed to construct it. D b) Find the surface area of the prism. (Answer correct to $d.p$) To find the length of the square base, you can first find the area of the square base in Unit - Surface Area and Volume Unit Surface Area and Volume - Practice Test Multiple Choice MULTIPLE CHOICE Calculate the area. Surface Area and Volume (Chapter 8) Syllabus reference MS If you have any difficulty with these questions, refer to the examples and questions in the sections listed Surface Area and Volume Test $MaV = r \pi 2h$ $V = 1/3r \pi h^2$ Volume of a cone is always $1/3$ the volume of the cup (cylinder) with the same height and base.
