Learn how to use this t-table with the information, Critical values of t for one Significance level (a) -tailed T-Distribution Table (One Tail). Then, find the row corresponding to degrees of freedom.  $\text{prob } t \text{ t t t t t t t t one-tailtwo-tailsdf}$  Learn how to use the t table to find the critical values of t for different statistical tests and confidence intervals. T-Distribution Table (One Tail) For the T-Distribution Table for Two Tails, Click Here The truncated t-table below shows the critical Critical values of t for one Significance level (a) -tailed For more info on the parts of the t table, including how to calculate them, see: degrees of freedom and alpha level. Download the t table for free and follow the step-b This t-distribution table provides the critical t-values for both one-tailed and two-tailed t-tests, and confidence intervals. For more info on the parts of the t table, including how to calculate them, see: degrees of freedom and alpha level Table of critical values of t: One Tailed Significance levelTwo Tailed Significance level:  $dft$  Table cum. In the t-distribution table, find the column which contains  $\alpha =$  for the two-tailed test. Download the t table for free and follow the step-by-step guide with examples Suppose you perform a two-tailed t-test with a significance level of  $\alpha$  and degrees of freedom, and you need to find the critical values. Learn how to use the t table to find the critical values of t for different statistical tests and confidence intervals.
