A must-have for every gardener in California looking for a new way to garden in a changing climate In recent years California has been facing extreme drought, and in 2015 they passed state-wide water restrictions that affect home owners. Unfortunately the drought is only going to get worse, and gardeners who arent willing to abandon their beloved pastime entirely are going to have to learn how to garden with the absolute minimum of water.The Drought-Defying California Garden highlights the best 230 plants to grow, shares advice on how to get them established, and offers tips on how to maintain them with the minimum amount of water. All of the plants are native to Californiamaking them uniquely adept at managing the harsh climateand include perennials, annuals, shrubs, trees, and succulents.
