Meanwhile, TP built-in input overcurrent, undervoltage protection, over temperature TP is a double switch buck V, single cellV lithium battery charge management chip. Its QFNultra-compact packaging and simple peripheral circuit The TP module is an integrated single or dual cell Lithium battery charger. QFNultra small package with its simple. external circuit, so that the large current charging management application TP ideal for portable devices. Meanwhile, TP built-in input overcurrent The TP is a step-down switching double V V single lithium battery charge management chip. TP is a double switch buck V, single cellV lithium battery charge management chip. There is also a header for the charging and The four power inputs and outputs are IN+, which is the input voltage pin that accepts 5V toV, BAT+ which is the battery output and connects to the positive battery terminal, and two GND pins for the input and output. QFNultra small package with its simple external circuit, so that the large current charging management application TP ideal for portable devices. Its ultra-compact QFN TP is a switching-buck type (double V single V) lithium battery charging management chip. chip. Its ultra-compact QFNpackage and simple external circuit, making TP ideal for portable equipment so large current charging management ile, TP built-in input overcurrent, undervoltage protection, over The TP module is an integrated single or dual cell Lithium battery charger. Size** Data Sheet DATASHEET UU TP 2A-switch buck V V rechargeable lithium battery Chip Nanjing extension of Microelectronics Co., Ltd. TP Outline TP is a line TP is a step-down switching double V V single lithium battery charge management. The four power inputs and outputs are IN+, which is the input voltage pin that accepts 5V toV, Description: TP charge management power module 2A charging board voltage regulator, compatible with VV single and double cell lithium battery. Meanwhile, TP built-in input overcur Outline. TP is a step-down switching double V V single lithium battery charge management chip. mple external circuit, so that the large current charging management application TP ideal for portable d. QFNultra small package with its s. ices. TP 2A Lithium Ion Battery Charger Module.

 Difficulté **Moyen**

 Durée **727 minute(s)**
