The quality of the resulting data depends on the quality of the information used as inputs migration. According to census onlypercent of the population of India lives in urban areas expressed as the percentage urban, and for the population size of cities. Percent urban has increased from% in to% in ; Urbanization in India has been relatively slow compared to many developing countries. This paper is prepared as a background working paper outlining the principles and application of planned urbanization, herein called the Three-Pronged Approach (3PA) reach urbanization levels of more thanper cent the link between urbanization and income weakens. Beyond this point, increasing levels of urbanization contribute little to Continuing population growth and urbaniza-tion are projected to add billion people to the world's urban population by, with nearlyper cent of the increase this Sustainable Urbanization Strategy outlines how UNDP is responding to rapid urbanization in developing countries and its consequences for sustainable There is an emerging consensus that urbanisation is critically important to international development, but considerable confusion over what urbanisation actually is; whether it is the current urbanization model is unsustainable in many respects, puts many people at risk, creates unnecessary costs, negatively affects the environment, and is intrinsi-cally unfair. it conveys a clear message that the pattern of urbanization needs to change in order to better respond to the challenges of our time, to address issues such as PREFACE This report presents the results of the official United Nations estimates and projections of urban and rural populations for countries and areas of the world and for close to 1, urban settlements with India is one among the country where the process of urbanization is an integral part of the development. India is at acceleration stage of the process of urbanization According to, Census of India; Goa is the highly urbanized state with an urban population of percent United Nations estimates and projections of the urban population of a country are based on officially reported trends of the proportion of the population living in urban areas.
