## Introduction

Can I download Tidal music to computer? No matter you are subscribed to Tidal Premium or Tidal HiFi plan, you can't download Tidal music to your computer. The 'Download' option is only available for users who are using mobile devices, like Android and iOS smartphones. So, what should you do if you'd like to listen to Tidal music and playlists on your computer offline?

It's well-known that Tidal provides HiFi, MQA, and high-quality audios for users. It's a wonderful platform for audiophiles. But high sound quality always requires high internet speed. As a result, the best way to get the best listening experience of enjoying Tidal music is to download Tidal music to computer.

Fortunately, AudFree Software has developed and created a professional Tidal Music Downloader, which is available for Tidal HiFi and Premium users to download music from Tidal to computer. Even if you are using a free-trial Tidal account, it works well for you. Besides, in some countries, it's also available for users to do that without Premium.

Are you interested in download Tidal music, playlists for offline listening? Follow me to see how to achieve it step by step.

## How to Download Tidal Music to Computer - Easy Guide

First of all, please download the Tidal desktop app and the AudFree Tidal Music Downloader on your Mac or Windows computer. This smart Tidal downloader needs to work with the Tidal app together. And then let's see how it works to download HiFi and MQA Tidal music to computer.
