Introduction

Many Spotify users with a free subscription have a similar question: how to download music from Spotify without Premium?

To fix this issue once for all, here, I'd like to share my successful experience to do that. I will introduce the detailed steps on how to download Spotify songs for free.

Download Music from Spotify without Premium - Required Tool

There are two plans for music lovers to access Spotify's music library. One is a free tier, the other is a premium subscription. Just be one of its membership, users can browse and listen to favorite songs on multiple devices, like computers, mobile phones, etc.

But free users have no right to download Spotify songs for free. Like other streaming music platforms, Spotify encrypts its all-music files. Offline listening is the privilege of Premium subscribers.

Under this circumstance, it's not able to download music from Spotify for free via the Spotify app only. It's necessary to draw support from a third-party tool, called Spotify Music Downloader. It's specialized in download Spotify songs as local files for both free and premium users. Also, it's a professional music converter for Spotify, which has the ability to download Spotify files to MP3, FLAC, WAV, AAC, M4A, etc.

In virtue of this software, you can download Spotify songs without Premium. After that, you can listen to Spotify songs, playlists, albums, podcasts, etc. offline with ads. No need to be disturbed by Shuffle Mode and you can play them with unlimited skips on Android phones and iPhone.

By the way, this tool can keep almost 100% original quality. Titles, artists, albums, year, and other parameters can be also saved well.

How to Download Spotify Songs for Free - Detailed Steps

Now, let's see how to use this AudFree tool to download music from Spotify for free step by step.

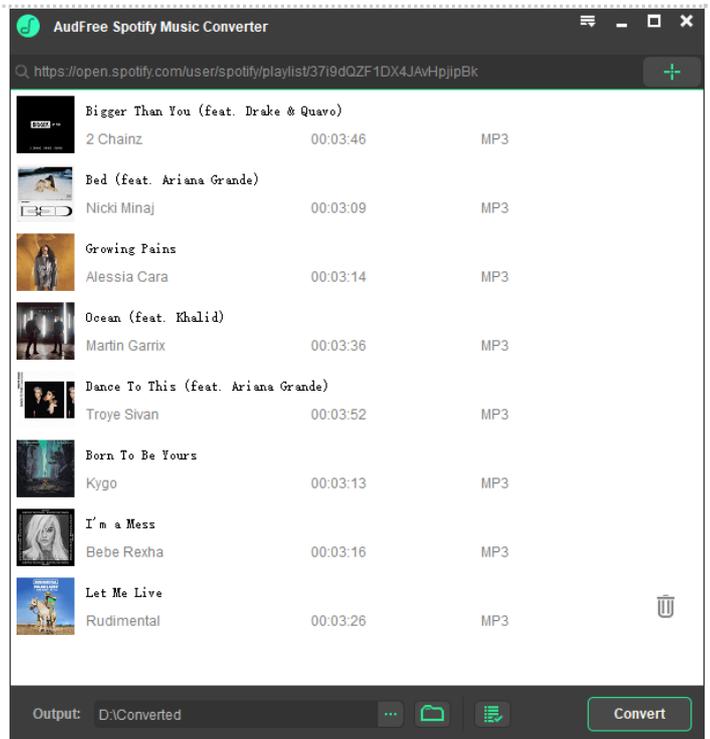

Matériaux

Outils

Étape 1 - Add Spotify songs, playlists to this tool for download

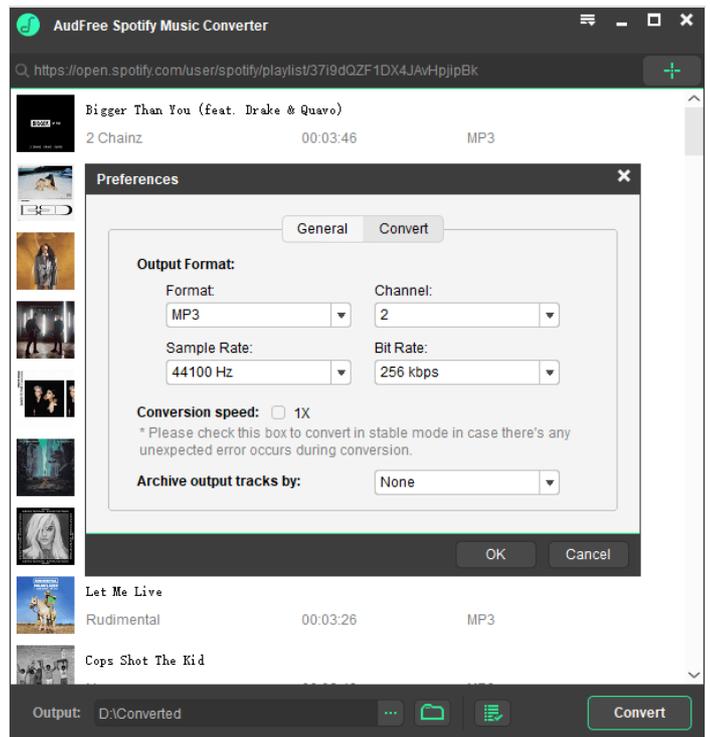

Install and launch this AudFree Spotify Music Downloader on your computer. The Spotify app will be opened with this tool. Please click the top-right menu bar to choose 'Register' to activate your license by inputting the account details. Go back to the Spotify app and find the tracks that you'd like to download for free.

Drag and drop them from the Spotify app to the AudFree's main interface. Or copy the URL of the Spotify track and paste it to the given space and click the '+' button to load them.

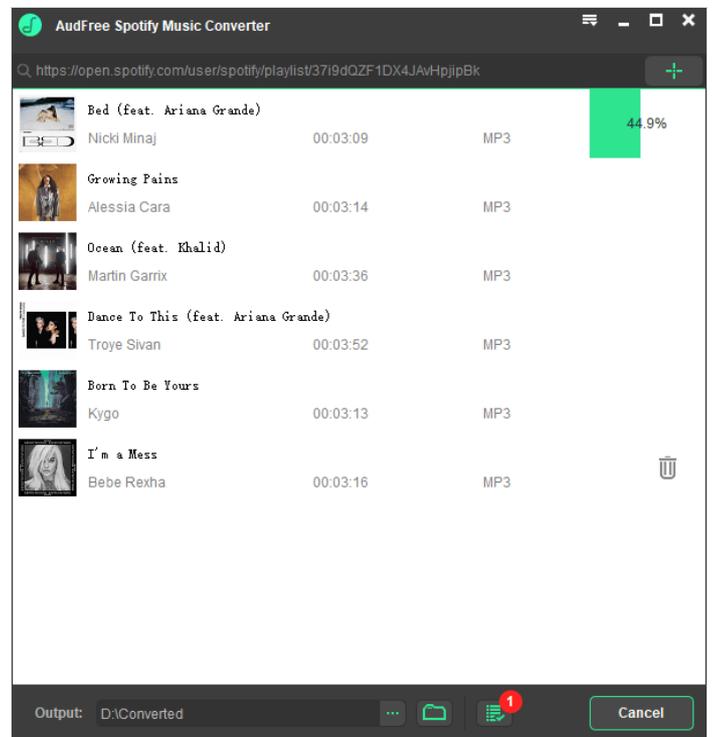

Étape 2 - Set output format and other parameters for download

Click the menu bar again to choose Preferences > Convert. It will pop up a setting window. Please reset the output format and audio parameters like sample rate, bitrate, and so on. As far as I'm concerned, I usually choose MP3, 320 kbps, 48000 Hz for my Spotify downloads. Tap 'OK' to confirm your settings.

Étape 3 - Download music from Spotify without Premium

Press the 'Convert' button to start the downloading process. In general, it will take one minute to convert a 5-minute song. All Spotify downloads will be saved to the destination folder on your computer. Please be well noted that you just need a free Spotify account to download Spotify tracks as you want.
