Air Force One meets The Martianwith a dash of Knives Outin this action-packed sci-fi thriller. Imperium is the most expensive structure ever created. Once an orbiting laboratory, it is now a space hotel for the fantastically wealthy. But as the station preps for its first group of space tourists, Dr. Chloe Bonilla, Imperiums resident biophysicist, finds herself questioning whether babysitting a passel of space glampers is worth the distraction from her research. A private rocket

delivers a rogues gallery of the worlds elite to Imperium eccentric billionaires, callow tech bros, a sponsored Instagram

have a bone to pick with these scions of the 1 percent. As the Reckoners take control of Imperium and demand an \$8 billion	ì
