Sacrifice documents the true story of a very respected doctor of maternal fetal medicine, who in 2020, finds his entire profession has lost its mind, as well as its soul. He finds himself in the predicament of The Obsolete Man in Rod Serling's Twilight Zone. As his colleagues all around him take the bribe money, drink the Kool-Aid, and push the shots, James Thorp is one of the few ObGyns to bear witness and broadcast the multitude of pregnancy complications including miscarriage, stillbirths, and many others resulting from the shots. Dr. Thorp is one of a rare few doctors from the maternal-fetal medicine realm who publicly protested the Covid shots as directly deadly to unborn babies his patients. He witnessed the carnage on a daily basis firsthand. He documented it, published papers, and spoke up on countless media platforms, and in Senate hearings in Washington, DC. He was terminated, without any cause, and went on to campaign around the country, to get the truth out. This is his story.
