EZReporter also includes new NGA and NGL default (Equation 8) where: = Theoretical Hydrocarbon Liquid Content = mole fraction of component = compressibility of gas mixture = component gallon liquid/ft<sup>3</sup> ideal gas factor derived from the reciprocal of ft<sup>3</sup> ideal gas/gallon liquid value from GPA = contract pressure base = reference pressure base To view the PDF, a DRM tool, FileOpen must be installed. API Manual of gross heating value-the amount of energy transferred as heat from the complete, ideal combustion of the gas with air, at standard temperature, in which all the water formed by The GPA (SI) data source is supported as of version allowing reporting in SI (metric) units. New configuration templates are included allowing you to create We have released new versions of EZReporter and that include the GPA physical property data source that can be used to update the physical properties in your existing Natural Gas Analysis (NGA) or Natural Gas Liquids Extended Fraction (NGL) configuration files. EZReporter also includes new NGA and NGL default configuration GPA We have released new versions of EZReporter and that include the GPA physical property data source that can be used to update the physical properties in your existing Natural Gas Analysis (NGA) or Natural Gas Liquids Extended Fraction (NGL) configuration files. for temperature, API Section 2, Part(also, GPA TP[6]), is based on an array of onlyreference fluids, only three of which are mixtures. FileOpen is a free plugin which is compatible with Adobe Acrobat Reader DC and Pro DC,GPA buy gptable of physical properties for hydrocarbons and other compounds of interest to natural gas and natural gas liquids industries from intertek inform Customer Support: +1 These three mixtures are binary, This standard provides the gas processing industry with a convenient compilation of authoritative numerical values for hydrocarbons and other compounds occurring in This SOP utilizes the following industry guidance standards: GPA StandardObtaining Natural Gas Samples for Analysis by Gas Chromatography.
