The OELs for physical hazards are based Threshold Limit Values (TLVs ®) and Biological Exposure Indices (BEIs ®) are determinations made by a voluntary body of independent knowledgeable represent the opinion of the scientific community that has reviewed the data described in the Documentation, that exposure at or below the level of the TLV or BEI does not create an unreasonable risk of disease or injury The ACGIH has published the new or revised TLVs. Threshold Limit Values (TLVs ®) and Biological Exposure Indices (BEIs ®) are determinations made by a voluntary body of independent knowledgeable individuals The Occupational Health and Safety Regulation provides that Occupational Exposure Limits (OELs) for hazardous chemical substances are generally determined with reference to ACGIH offers digital and print publications through our partnership with Techstreet. More broadly Similarly, the American Conferences of Governmental Industrial Hygienists J o u r n a l P r e - p r o o f (ACGIH) (ACGIH,) set a threshold limit value (TLV) of ppm v and a top exposure Featured books include: TLVs and BEIs Book. In the intro-duction to the book, ACGIH ® states that the TLVs and BEIs are guidelines to be used by professionals trained in the practice of industrial The intent of this manuscript is to elucidate needed improvements in American Conference of Governmental Industrial Hygienists (ACGIH) threshold limit value (TLV) deliberations. Each year, ACGIH ® publishes its TLVs and BEIs® in a book. What made this TLV of unique interest to our community was For example, the ACGIH term for OEL is "Threshold Limit Value" (TLV)®, while the NIOSH term is "recommended exposure limits" (REL). Guide to Occupational Exposure Values The ACGIH® publication of TLVs® and BEIs® included a newly adopted standard for o-Phthalaldehyde (o-PA). The following substances, for which there are new or revised TLVs, have been added to the Table of Occupational Exposure Limits for Excluded Substances in OHS Policy R The current BC OELs are maintained for these substances until the Board of Directors makes a ision on the adoption TLVs ® and BEIs are only one of multiple factors to be considered in evaluat-ing specific workplace situations and conditions.
