I could imagine writing a start-up script setting the print as image mode. In my case, it turned out that unchecking "print as grayscale" in the main print window settings was the solution to ungray the print as image, and that the print as image was the solution (albeit a slow one) to my original flattening/processing endless loop problem. The location of the Print as Image options depends on the version of Reader or Acrobat. Follow these easy steps to change a PDF to JPG, PNG, or TIFF with the Acrobat image converter: Click the Select a file button above, or drag and drop your PDF into the drop zone. You can also try printing the PDF as an image to see if that resolves the issue. Click Menu > Print > Advanced. With the help of Adobe, you can also print PDF as an image. Additionally, check for any pending or missing updates for your printer driver and firmware, and update them if necessary. Drag and drop or upload the PDF document you want to convert to an image file. Select the PDF you want to convert to an image with the help of our PDF to JPG converter.
