This Standard has been prepared in accordance with recognized engineering principles and should not be used without the user's competent knowledge for a given application. Example: Analyze the bolt forces on a grouted square base plate loaded parallel to the edge and a bolt circle of 12" and (12) / 4" bolts spaced at 3". This revision to this Standard and is intended to replace ASCE in its entirety. Design of Steel Transmission Pole Structures. This consensus standard covers proper specification and/or development of the various loads and load combinations. The vertical load is kips and the moment is kip-ft (in-kips). ASCE/SEI, provides design parameters applicable to self-supporting structures, with base plates for installation on a concrete pier foundation, or as direct embedded, backfilled poles with the base section being either steel or concrete. Design of Steel Lighting System Support Pole Structures, ASCE/SEI, provides design parameters applicable to self-supporting structures, with base plates for installation on a concrete pier foundation, or as direct embedded, backfilled poles with the base section being either steel or concrete. Manual of Practice No. 10. Out of Print: Not available at ASCE Bookstore. Abstract: Design of Steel Pole Transmission Structures, Design of Steel Transmission Pole Structures specifies requirements for the design, fabrication, testing, assembly, and erection of cold-formed tubular members and Transportation Research Board "Design of Steel Pole Transmission Structures, ASCE Manual No. 10", provides a uniform basis for the design and fabrication of steel pole structures. This revised and updated System Support Pole Structures, ASCE/SEI, provides design parameters. ISBN (PDF) Manufactured in the United States of America. Abstract. Design of Steel Lighting System Support Pole Structures, ASCE/SEI, provides design parameters applicable to self-supporting structures, with base plates for installation on a concrete pier foundation, or as direct embedded, backfilled poles with the base section being either steel or concrete. This book is the first. Document Type: Book. Manual of Practice. The plate is 12" square and the inside of the base plate has a diameter of 12".

 Difficulté **Difficile**

 Durée **505 heure(s)**

 Catégories **Décoration, Électronique, Alimentation & Agriculture, Machines & Outils, Jeux & Loisirs**

 Coût **664 EUR (€)**
