This specification covers zinc-coated steel structural wire rope, prestretched or nonprestretched for use where a highstrength, relatively flexible prefabricated zinc-coated ASTM-A Standard Specification for Zinc-Coated Steel Structural Wire Ropesteel wire; wire; To find similar documents by ASTM Volume (Coated Steel Products) To find similar astm a + redline standard specification for metallic-coated steel structural wire ropeincludes standard + redline (pdf) ASTM A Standard Specification for Metallic-Coated Steel Structural Wire Rope. The building block of structural bridge rope and bridge strand is galvanized wire. · ScopeThis specification covers metallic-coated steel structural wire rope, prestretched or nonprestretched for use where a high-strength, relatively flexible prefabricated Description. The current ASTM A and A specifications for these items mandate the physical requirements for the wires. The requirements include the mechanical properties, stress under load, elongation, tensile strength, ductility, zinc coating weight ScopeThis specification covers steel sheet, zinc-coated (gal-vanized) or zinc-iron alloy-coated (galvannealed) by the hot-dip process in coils and cut lengths The product is produced in various zinc or zinc-iron alloy-coating weights [masses] or coating designations as shown in Table 1 astm a + redline standard specification for metallic-coated steel structural wire ropeincludes standard + redline (pdf) ScopeThis specification covers zinc-coated steel structural wire rope, prestretched or nonprestretched for use where a high-strength, relatively flexible prefabricated zinc-coated multiple-wire tension member is desired as a component part of a structureThe wire rope is furnished with Class A weight zinc-coated wires throughout standard by ASTM International,/01/View all product details Most Recent Track It. LanguageScopeThis specification covers metallic-coated steel structural wire rope, prestretched or nonprestretched for use where a high-strength, relatively flexible prefabricated metallic-coated multiple-wire tension member is desired as a component part of a structureThe wire rope is furnished with Class A weight zinc or zinc-aluminum WIRE PRODUCTION.
