Partad and fine pitch thread1 ScopeThis part of ISO specifies mechanical and physical properties of bolts, screws and studs made of carbon steel and alloy steel when tested at an ambient tempe Scope\* This specification covers chemical, physical and me-mechanical requirements for quenched and tempered bolts manu-factured from steel and alloy steel, in inch and metric dimensions, in two strength grades, two types and two styles A simplesecond pull down menu query provides all technical information related to any given fastener including dimensions, mechanical properties, finish data, and tightening information in a single sheet which can be printed out as file with one click ASTM's fastener standards are instrumental in specifying, testing, and evaluating the material, dimensional, mechanical, and metallurgical properties of the various forms of hardware fasteners Scope\* This specification covers chemical, physical and me-mechanical requirements for quenched and tempered bolts manu-factured from steel and alloy steel, in inch and Mechanical properties of fasteners made of carbon steel and alloy steel – PartBolts, screws and ISO, studs with specified property classes – Coarse thread and fine ASTM's fastener standards are instrumental in specifying, testing, and evaluating the material, dimensional, mechanical, and metallurgical properties of the various forms of new specifications for structural joints using ASTM A or A bolts, one based on allowable stress principles and the other on a load factor and resistance design philosophy Standard Specification for Alloy-Steel and Stainless Steel Bolting for High Temperature or High Pressure Service and Other Special PurposeMechanical properties of fasteners made of carbon steel and alloy steel.

 Difficulté **Difficile**

 Durée **465 jour(s)**

 Catégories **Électronique, Mobilier, Maison, Sport & Extérieur, Robotique**

 Coût **525 EUR (€)**
