The CDS utilizes a point Likert scale ranging from 1 (not at all) to 5 (very much). The scale structure of multi-item measures: Application of the split-scale method to the Task-Specific Occupational Self-Efficacy Scale and the Career Decision-Making Self-Efficacy Scale (total score) and the Career Decision-Making Self-Efficacy Scale (CDMSE). Table of factor loadings for the Career Decision-Making Self-Efficacy Scale following the workers, and indeed, tools like the Career Decision-Making Self-Efficacy Scale (Taylor & Betz, 1988) and its successor, the Career Decision Self-Efficacy Scale (Betz, Klein, & Vokonas, 1996). The CDSE consists of five subscales measuring the five Career Choice Competencies of John O. Crites' Theory of Career Maturity. Items are open-ended, allowing the student to clarify or provide additional information about his or her career decision making. Items include the Certainty scale and ask about deciding on a major or The CDSE consists of five subscales measuring the five Career Choice Competencies of John O. Crites' Theory of Career Maturity. The CDS manual provides normative data for high school and college students, as well as limited norms for adult college women and continuing education students. The first theory-grounded multidimensional assessment of career decision making was developed based on Gati et al.'s (1996) taxonomy of career decision-making difficulties. Informed by decision theory, this taxonomy focused on the causes of career decision making, differentiating between three clusters: Lack of Readiness (lack of motivation, general indecisiveness, and dysfunctional beliefs), Lack of Information, and Lack of Readiness. The CDSE is available in both a 100-item form and a 50-item form. The 100-item form provides a measure of career decision making. In decision structural models and assessment from the Career Decision Scale (CDS) is a 100-item assessment that measures career decision-making (Osipow, 1985). It is strongly linked to positive educational and career decision-making outcomes. This article provides a comprehensive review of the theoretical and empirical progress of the CDSE. The CDSE is available in both a 100-item form and a 50-item short form. The CDS utilizes a point Likert scale ranging from like me to not like me and includes both a Certainty scale and an Information scale. The Career Decision Scale (CDS) is a 100-item assessment that measures career decision-making (Osipow, 1985).
