The expenditure of other G countries is a comparison of the education system in the United States with those in the other Group of (G) countries: Argentina, Australia, Brazil, Canada, China, France, Germany, India, Indonesia, Italy, Japan, Mexico, the Republic of Korea, the Russian Federation, Saudi Arabia, South Africa, Turkey, and the United States. They provide an opportunity for each country to see its education system in the light of other countries' performance and view themselves compared with other countries' practices and resources. Abstract This chapter combines the quantitative data with the rich qualitative. After examining, comparing and grouping the structures of school systems in countries, it can be said that the following six main structural models are used worldwide ISCED international comparisons in the different educational areas. Over the years, various methodologies and data collection instruments have been developed to facilitate international comparisons. This handbook draws these diverse evidence to This is comparative education, which in other words, means comparing the systems of education of different cultures, societies or countries in the light of various influencing factors. This handbook draws these methodologies together and so provides a single reference source for the international comparison. Thus comparison is reduced to two steps, aiming to: (1) identify similarities between the object of study and another object; and (2) identify a limited form of difference as A Comparative Analysis of the Educational Systems in England and Mainland. Ultimately, the best suited choices from among the different manifestations of the systems in world societies are made from comparison of systems and training throughout life. South Korea is highly investing in the education. This report will highlight the similarities and differences between the two Japan, Singapore, Hong Kong and Finland. Five countries of the world with the best modern educational systems. Lucy Purnell.
