This software is designed to produce PDF files in a heterogeneous network by providing a PDF printer on the central fileserver. See the Debian policy for a definition of virtual packagesIf you've CUPS installed, you can easily add a PDF Printer by installing the cups-pdf package: `sudo apt-get install cups-pdf` or since Ubuntu `sudo apt-get install printer-driver-cups-pdf` The pdf printer provided by that package will print the resulting PDFs into the `/home/[user]/PDF` directory CUPS-PDF. Install printer-driver-cups-pdf Using apt-get. This freely-available printing system has become the standard for printing in most Linux distributions, and uses the standard Internet Printing Protocol (IPP) to handle network printing. Using `apt-get install cups-pdf` works okay, but I want to install it in code source. The `-p` option specifies that you want to see a list of printers, and the `-d` option reports the current The Common UNIX Printing System, or CUPS, is the most widely-used way to manage printing and print services in Ubuntu. This freely-available printing system has become Missing: pdf » Ubuntu» Packages» focal (LTS)» virtual» cups-pdfVirtual Package: cups-pdf This is a virtual package. Run the following The Common UNIX Printing System, or CUPS, is the most widely-used way to manage printing and print services in Ubuntu. You can choose one of them. It is available under the GPL and is packaged for many different distributions or can be built directly out of the source files There are three methods to install printer-driver-cups-pdf on Ubuntu We can use `apt-get`, `apt` and `aptitude`. CUPS manages print jobs and queues, and provides support for a wide range of printers `sudo apt-get update` On Ubuntu, I want to install cups-pdf. Build cups-pdf: `gcc -o cups-pdf `cups-configflags` cups-pdf.c `cups-configlibs``. You CUPS provides the System V (lp) and Berkeley (lpr) command-line interfaces, a configurable interface, a C API, and common print filters, drivers, and backends for Use the `lpstat (1)` command to see a list of available printers: `lpstat -p -d`. Update apt database with `apt-get` using the following command. In the following sections we will describe each method. This is what I've tried: Download code from `~vrbehr/cups-pdf/src/`. There are three methods to install printer-driver-cups-pdf on Ubuntu We can use `apt-get`, `apt` and `aptitude`. In the following sections we will describe each method.
