The following tours assume a basic familiarity with the Dart language, which you can get from skimming the language tour. Next, learn about futures by following the asynchronous programming codelab. A brief, example-based introduction to the Dart language. In Dart, List is a collection of elements that can belong to different types. It does not specify how to write asynchronous Dart code that uses futures and the async and await keywords. Once you're familiar with the language and futures, learn about streams and packages, which are fundamental to most Dart programs

Dart Programming Language Specification Scope ecmaScope
