The LM device is an adjustable three-terminal positive-voltage regulator capable of supplying more than A over an output-voltage range of V toV. It requires only two external resistors to set the output voltage. The °C proximity presumes that the ambient air temperature is almost the same as the surface temperature Before carrying out any maintenance operations on the device, disconnect all electrical connections 3 Description. Glue or cement the device to a surface and the temperature should be within about °C of the surface temperature. The device features a typical line regulation of % and typical load regulation of % The LMis easily applied in the same way as other integrated-circuit temperature sensors. Before working on the electrical connections, disconnect the device from the main power supply. Installation must comply with local standards and legislation. DFS software communicates with Range scales to manage scale parameters, DatabladStandard Audio DatabladHætte til tagrumsventilation (bølgetag) pdf,8 KB DatabladHætte til tagrumsventilation (skifertag) Recommended mounting position: vertical. This product is designed to comply with the following EU standards: Low voltage guideline: /35/EU Dibal-DFS-databladFree download as PDF File.pdf), Text File.txt) or read online for free. I vores downloadcenter finder du alle vigtige dokumenter, som du har brug for til dit projekt Standard Audio Software class and structure: class A. CE COMPLIANCE.
