Much of the time using the term 'digital' as a qualifying or descriptive adjective is redundant. The Declaration on Digital Rights and Principles presents the EU's vision for digital transformation. It is also invariably an inaccurate qualification. The tensions between human rights and freedoms, and the rise in restrictions of access to online spaces, will continue to shape a framework for digital rights. This proposal for a Digital Rights Governance Framework focuses on the local safeguarding of human rights in the digital age. The Declaration on Digital Rights and Principles presents the EU's vision for digital transformation. The chapter then describes key cross-cutting trends, opportunities, and challenges characterising the digital age (Section). Our goal is to promote, protect and uphold fundamental rights in the digital age as an Adjective. This vision puts people at the centre, in line with EU values and fundamental rights. Clear trends have emerged globally, with all internet users facing, to varying degrees, similar opportunities, challenges, threats and human rights violations. Read the Declaration on Digital Rights and Principles in full to find out about the EU's commitment to a secure, safe and sustainable digital transformation. When applied to the concepts, traditions and conventions of 'citizenship', 'rights' and 'literacy' it is often exasperatingly imprecise. The chapter begins with an introduction to and overview of selected human rights whose saliency, safeguarding, and exercising has been affected in the digital age (Section). Specifically, it outlines how cities can uphold a human rights-based approach with regards to the digitalisation of their services and to some extent the digital environment. This vision puts people at the centre, in line with EU values. A joint Declaration by the EU institutions on the values and rights applicable in the digital environment, based on the EU treaties, the Charter of Fundamental Rights and other instruments, would address connectivity, the prevention of internet fragmentation, free choice of how personal data are used, application of human rights. Cities Coalition for Digital Rights. Digital technologies and internet access have a tremendous potential to contribute to address inequalities, but also to exacerbate them. European Digital Rights (EDRi) is a network of civil and human rights organisations from European countries. Digital context of city-governments.
