For example, take the two vowel sounds /a/ (as in cat) and /ɪ/ (as in sit). The first vowel Read the words from the oy list on Handout 2, one at a time After reading each word, have students write the word in oy column on their handout and underline the letters oy Phonics Diphthongs-oi boil broil coil coin foil hoist join joint joist moist oink point soil spoil toil voice void-oy boy coy joy ploy Roy soy toy Troy-ou bound cloud couch count foul found ground hound house loud mound mouse mouth noun pound proud scout shout sound south trout-ow brow brown clown crowd crown down down down frown growl plow scowl Word lists – Diphthongs ai kind and aʊ out əʊ toe and ɔɪ join iə ear and eə hair ʊə pure and ei paint ai əʊ iə ʊə kind toe ear pure flight propose bear secure pride toast near manicure height boat fear mature sight coast clear Europe aʊ ɔɪ eə ei out join hair What is a diphthong? The vowel quadrant shown below illustrates the diphthongs by drawing arrows from the beginning to the ending tongue positions for each one. Use Diphthongs Monophthongs and diphthongs ɪ monophthongs a simple, single sound [a] father [bought ɪ diphthongs a sequence of two sounds à vowel + glide [a+j] bite [English Diphthongs A diphthong is a combination of two vowel sounds pronounced together, for example, /eɪ/ as in play /pleɪ/ and /əʊ/ as in cold /kəʊld/. A diphthong is the sound of two vowels pronounced together as one syllable by gliding quickly from the first vowel to the second. Display words with the target digraph, one at a time. When we glide quickly from /a/ to /ɪ/, we get an /aɪ/ sound (as in try or bye) Then view our diphthongs list that features all eight sounds, examples, and their unique pronunciation using the International Phonetic Alphabet (IPA)/aʊ/ as in “town” The /aʊ/ diphthong is a journey from a wide, open-mouthed position to a more rounded, closed one. In addition to the change in tongue position, the diphthongs /aw/ and /oy/ also have a change in lip rounding; /aw/ begins with unrounded lips and changes to rounded lips, and What is a diphthong? A diphthong is the sound of two vowels pronounced together as one syllable by gliding quickly from the first vowel to the second. It’s often represented by “ow” or “ou.” vowels diphthongs. For example, take the two Missing: pdf • Read the list of words together and discuss the meaning of each word Model od ing words with a vowel digraph.]]
