DLMS (Device Language Message Specification) is a suite of standards developed and maintained by the DLMS User Association. COSEM (Companion Specification for Energy Metering) includes a set of specifications that define the transport and application layers of the DLMS protocol the transport and application layers of the DLMS protocol. The ClassId and the InstanceId can be found in the object list. According to the Blue Book, the object list is the attribute of The DLMS User Association defines the protocols into a set of four specification documents namely Green Book, Yellow Book, Blue Book and White Book. The DLMS User Association defines the protocols into a set of four specification documents namely Green Book, For using this library, it is required that you have a thorough understanding of DLMS Blue Book Classes and embedded C programming background. COSEM (Companion Specification for Energy Metering) includes a set of specifications that define the transport and application layers of the DLMS protocol Overview. The Blue book The AttributeId can be found in the Blue Book. For any development on The DLMS User Association defines the protocols into a set of four specification documents namely Green Book, Yellow Book, Blue Book and White Book. The library is provided as object coded with a configuration file for ease of use DLMS (Device Language Message Specification) is a suite of standards developed and maintained by the DLMS User Association. The Blue Book Excerpt DLMS Blue Book:COSEM Interface Classes and OBIS Object Identification System EXCERPT FROM Companion Specification for Energy Metering These revised Technical Reports of DLMS UA, considered as pre-standards for several parts of IEC, will be adopted by IEC in due course and subsequently by BIS in adopted Indian Standards being published This application report describes in detail the usage of DLMS COSEM library developed by Texas Instruments for customers who use TI's microcontrollers in metering applications.

 Difficulté Très facile
