Examples of abiotic factors include rocks, minerals, water, and the atmosphere. Consumers are heterotrophs and must eat other organisms to get energy. Energy in a food originates with the sun. What abiotic factors are key in determining the type of biome that exists in an area? A factor that is living or has lived. 2) What does abiotic mean? No prep – just print (or digitally assign) + Unit Ecology Study Guide Date \_\_\_\_ Hour \_\_\_\_ Define: a. Species \_Any group of organisms that can naturally interbreed & produce fertile offspring i. Grass, dog, cat 4) Give three examples of abiotic factors. It contains multiple-choice questions (and Study with Quizlet and memorize flashcards containing terms like Ecology, Biosphere, Biomes and more Ecology Study Guide Answers 1) What does biotic mean? The organisms in the habitat make up the biotic factors (plants, animals, fungi, bacteria, & protists) Unit Ecology Study Guide Date \_\_\_\_ Hour \_\_\_\_ Define: a. Sun, air, temperature Nutrients, such as carbon, water and nitrogen, cycle between the abiotic (non-living) and biotic (living) factors in a habitat. They are things like food, water, space, etc Limiting factors are resources an organism needs that are in limited supply. Biodiversity Degree of variation of life forms within a given ecosystem, biome, or the entire planet b. Example of a NON species: mule Sunlight is important to ecosystems because it provides the energy needed for plants to produce food. Producers are autotrophs and make their own food using energy from the sun or chemicals. Ecology Study Guide Review with Answer Key. \$ Looking for a comprehensive review for your unit on ecology? This is it! Species Population Ecology: Population: organisms part of the same species and live in a specific area Age structure: amount of population (expressed in %) that are at a certain This book is a study and revision guide for students following programmes of study in which ecology is an important component. A factor that is non-living or has never lived 3) Give three examples of biotic factors. Biodiversity Degree of variation of life forms within a given ecosystem, biome, or the entire planet b. Rainfall and temperature What types of things can be limiting factors?
