The aim of this study was to use the EVGS to determine what effect The Edinburgh Visual Gait Score (EVGS) was developed and used to visually assess gait deviations for ambulatory children with cerebral palsy (CP). İsmail Uysal¹, Fatih Özden^{2*}, Serap Tuna² and İsmet Tümtürk The Edinburgh Visual Gait Score (EVGS) is proposed as a simple and cost-effective tool for use in every-day practice, when instrumented gait analysis (IGA) is not available The document provides scoring criteria for different metrics for evaluating gait in patients with cerebral palsy using the Edinburgh Visual Gait Score (EVGS). With a total of 10 items, it provides a comprehensive view of a child's gait, focusing on aspects such as foot strike, knee flexion, and trunk movement The score established good intra-observer repeatability; however, at best moderate inter-observer repeatability was reported initially The Edinburgh Visual Gait Score (EVGS) is a comprehensive measure of gait abnormalities in children with cerebral palsy (CP) and has good psychometric properties. However, it is cumbersome to administer and requires multiple devices to record and measure its various components Edinburgh Visual Gait Scale (EVGS): The EVGS is an observational tool designed for subjective assessment of gait in children with cerebral palsy. For each metric, it The Edinburgh Visual Gait Score (EVGS) is a valid observational gait analysis scale to measure gait quality. The items selected represented, in our The Prosthetic Observational Gait Score was developed based on the Edinburgh Visual Gait Score for unilateral lower limb amputation. MATERIALS AND METHODS. A tabulated scoring system was devised to record observations for each lower limb of ambulant patients with cerebral palsy. A tabulated scoring system was devised to record observations for each lower limb of ambulant patients with cerebral palsy. The items Psychometric properties of the Edinburgh Visual Gait Score in children with spastic cerebral palsy. The test utilizes observational parameters of each major gait MATERIALS AND METHODS.
