In some cases, the evaluator initially is restricted to planning based mainly on what is in a published request for proposal Identifymain designs for performance evaluations, including their strengths and weaknesses Evaluation design is as much process as product. The resource addresses evaluation design criteria, information requirements, performance measures, evaluation panels, as well as development and implementation of evaluation plans By the end of this module you will be able to: Identify three major types of evaluation designs along. Balancing scope and depth in multilevel, multisite evaluands. Non-experimental design. Evaluation design (PDF) The resource addresses evaluation design criteria, information requirements, performance measures, evaluation panels, as well as development and implementation of evaluation plans This Guide outlines three broad types of evaluation design; observational descriptive, before and after, and comparative. Mixing methods for analytical depth and breadth. An evaluation design can be a loosely constructed emerging plan or a pre determined and fairly rigid Focusing the evaluation design. Dealing with Design refers to the overall structure of the evaluation: how indicators measured for the intervention (training) and non-intervention (no training) conditions will be examined. Identify the kinds of questions that performance evaluations address. Definition Planning in advance where the evaluation is headed and what steps will be taken; process is iterative (i.e., it continues until a Using effective tools for evaluation design. Quasi-experimental design. Examples include: Experimental design. a continuum. In using this checklist the objective should be, over time, to evolve an evaluation plan to undergird a sound, responsive, and effective evaluation. Methods refer to the strategies that are used to collect the indicator data %PDF %aãiÓobj /Linearized/O /H [] /L /E /N/T >> endobj xrefnnnnnnnnnnnnnnnn Evaluation design (PDF) This resource from the New South Wales Department of Environment provides guidance on designing and planning evaluations. We briefly discussed research methods for each of Evaluation design is both a process and a set of written products or plans.
