This works fine if the 'Microsoft Print to PDF' is the default printer however I do need to change this from time to time and forget to change it backExcel. Copying or moving an Excel-exported PDF file automatically to a specific folder location or local directory can be very easily achieved if you try to run a customized VBA macro program in Microsoft Excel, which essentially enables the user to freely select any desired file and folder location for output purpose Buy the Simple Sheets Invoice Template (all purchases help support this channel) the featured invoic I am currently using a vba macro to fill in a pdf form and print it to another pdf.

 Difficulté **Moyen**
