= degrees of freedom in denominator α = d.f.N. Degrees of freedom in denominator (df2) Degrees of freedom in numerator (df1) There are two tables here. R: A language and environ. For more about R, see: Development Core Team (). on 2, and typeset usin. al Computing, Vienna on 2, and typeset usin, . Table entries are critical values for F* with probably p in right tail of the distribution. R Foundation for Statisti. The second table gives critical values of F at the p = level of significance. ent for statistical computing. = degrees of freedom in numerator d.f.D. This has (x,y) degrees of freedom associated with it. Go along x columns, and down y rows F distribution critical valuesProduced by Peter Craig (@) using the R software package under the GNU General Public License, vers. F distribution critical valuesProduced by Peter Craig (@) using the R software package under the GNU General Public License, vers. d.f.D F Table for $\alpha = \emptyset$ df= Table entries are critical values for F* with probably pin right tail of the distribution. Degrees of Numerator Degrees of Freedom (V1) Freedom (V1) Critical Values of the F-Distribution (cont.) Taken from Rohlf and Sokal, Table Numerator Degrees of Freedom CRITICAL VALUES OF THE F DISTRIBUTION The obtained F is significant at a given level if it is equal to or greater than the value shown in the table. The α = points on the F Tabulated values are q-th quantiles for qf:5;;;9;;;;g denom numerator degrees of freedom inatordfF Distribution Tabled.f.N. Figure of F distribution (like in Moore,, p.) here. Figure of F distribution (like in Moore,, p.) here. Obtain your F-ratio. The first one gives critical values of F at the p = level of significance. LATEX.
