**DESCRIPTION**

measuring water pollution via our DIY water probe

This should be a one-line call to action for your project that displays on your landing page. Some volunteers will decide whether to try your project based on reading this, so try to write short text that will make people actively want to join your project. 251 of 300 characters remaining.

**INTRODUCTION**

measuring water pollution via our DIY water probe. The water probe is based on Arduino technology. Anyone can record water pollution level in her area and report it to the project leaders. A shared map featuring all values recorded worldwide is set up, and is available here:
