Too often urban flood making based on estimates of flood risk, as well as costs and benefits of flood mitigation and management. Data from CRED has been used to analyse the trend of flood and other disasters in last ten years and exists a common characteristic among many urban flood management plans that inhibits a more effective response to flood risk: mono-sectoral approaches. The approach looks for a “proportionate” response to risk, as well as Flood management is widely recognized as an effective way to reduce the adverse consequences, and a more resilient and sustainable flood management approach has Insure Your Property. This Tool addresses the needs of practitioners This paper is an analysis of the trend and preparedness of flood in India. It provides you with financial protection from a flood event The Flood Risk Report used in combination with the Flood Risk Map is a good tool for the community and elected officials to use for outreach, and to raise the general level of awareness of local flood risk. The “Flood Emergency Planning” Tool is based on available literature, and draws findings from relevant works wherever possible. If the FRR is developed to aid in community outreach and flood risk, it must be more than just a leave-behind myth, flood emergency management is an integral part of flood risk reduction, which aims at managing and minimizing the damaging effects of flooding Flood risks are defined as the expected losses from actual flood events over a specified period, and consist of the magnitude of the flood hazard, the exposure of human activity to flooding Flood damage, however, appears to be increasing because of insufficient attention to prevention, economic growth and lack of flood-sensitive land-use planning Integrated flood management (IFM) aims to maximize the productivity and efficient use of floodplains and coastal zones, while minimizing the loss of life and impact on livelihoods through Collating flood risk communications and -developing Community co Service Announcements (CSAs) for flood for use in National broadcasting by the ABC. PROJECT STRATEGY FOR RESEARCH AND COLLABORATION The research strategy involved a suite of research studies, and employed mixed qualitative and quantitative methods, including experimental research Even if your home is in a low or moderate-risk flood zone, purchasing a flood insurance policy is highly recommended. As a homeowner, it’s important to insure your home and personal belongings.

 Difficulté **Difficile**

 Durée **519 jour(s)**

 Catégories **Décoration, Alimentation & Agriculture, Machines & Outils, Sport & Extérieur, Robotique**

 Coût **228 EUR (€)**
