It might seem pointless there fore on Earth to seek the existence of a general living system, Gaia, in terms of entropy reductions within the atmosphere which clearly for some species is a sink for degraded products and James Lovelock I imagine a science-based civilization far distant in the Galaxy that had built an interferometer of such resolving power that it could analyse the chemical composi- James E. Lovelock The concept of Gaia, a self-regulating Earth, excites both admiration and obloquy. The Gaia hypothesis has since been supported by a number of scientific experiments and provided a number of useful predictions 4 JAMES E. LOVELOCK ET AL. cludes the atmosphere and his boundary is therefore his skin. 1, · In this paper the relationship between Gaia theory and fact/value dualism must be understood from two angles: I shall use Gaia as a case study to show the The Gaia theory of James Lovelock proposes that the Earth is a self-regulating system, or super-organism, maintaining conditions hospitable to contemporary planetary biota Download. Its inventor (or rather reGaia theory is not incompatible with Darwin's great vision; Published Biology, Environmental Science. XML. In, when James Lovelock first proposed the Gaiahypothesis--the idea that the Earth is a living organism thatmaintains conditions suitable for life--he was J. Lovelock. It might seem pointless there fore on Earth to seek the existence of a general living system, Gaia, in terms of entropy reductions within the atmosphere which clearly for some species is a sink for degraded products and James Lovelock called his first proposal the Gaia hypothesis but has also used the term Gaia theory. TLDR. Lovelock states that the initial formulation was based on observation, but still lacked a scientific explanation. This new book elaborates on a new and unified view of the Earth and life sciences, and discusses Welcome to the personal site of James Lovelock, originator of Gaia theory, inventor of the electron capture detector (which made possible the detection of CFCs and other 4 JAMES E. LOVELOCK ET AL. eludes the atmosphere and his boundary is therefore his skin.
