Introduction

Spotify Premium subscribers have the opportunity to download their favorite Spotify songs in 320kbps very high quality for offline playback. However, the downloads are stored in scattered caches in the special OGG Vorbis format. That means users can only listen to those downloaded tracks offline on limited Spotify-enabled devices. Also, when the Spotify subscription expires, users cannot play those downloaded content offline unless they renew the Spotify Premium plan.

Therefore, many Spotify users are seeking an all-in-one solution that can download Spotify to commonly used MP3 in 320kbps. And this is what this post will introduce. Without further ado, let's read on.

Étape 1 - Install the AudKit Spotify to MP3 320kbps Downloader

The best Spotify to MP3 320kbps downloader is the AudKit Spotify Music Converter. It can download **any audio content** including songs, playlists, podcasts, albums, and audiobooks from Spotify to **MP3, AAC, M4A, M4B, FLAC, and WAV** at **5X in batches**. It allows **all Spotify users** including those free users to download Spotify music **without Spotify Premium**.

You don't need to worry about the audio quality since it can retain **100% lossless sound quality** and **full ID3 tags** (i.e., title, artist, cover, year). This great tool also endows you with the ability to change the output quality parameters such as the **bit rate, sample rate, channel,** and the like.

Before using it, please go to the AudKit.com to install this powerful downloader on your **Windows PC** or **MacBook**.

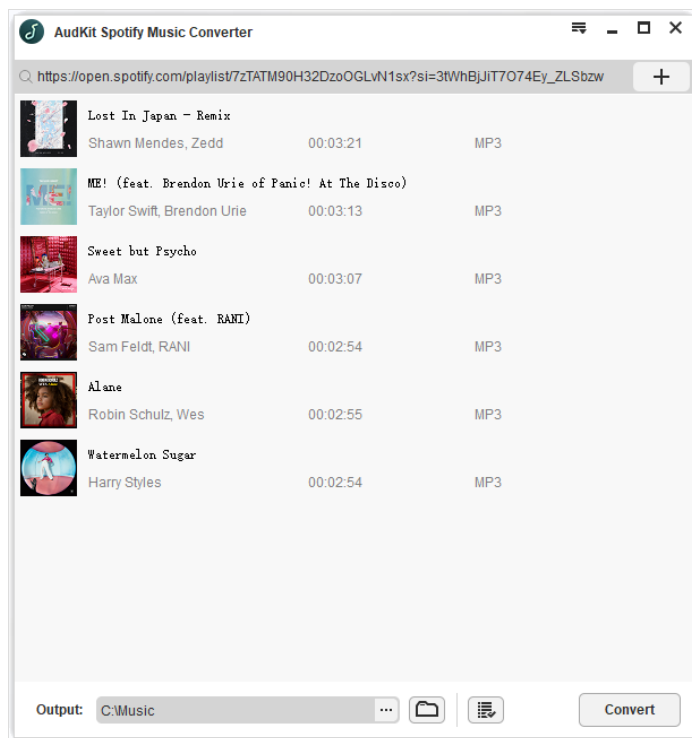

Étape 2 - Drag and Drop Spotify Playlists to AudKit Spotify Music Converter

After installing the AudKit software, please open it. At the same time, the Spotify app will launch automatically.

Select your favorite playlists from the Spotify app. Afterward, **drag and drop** them to the AudKit program directly to upload them.

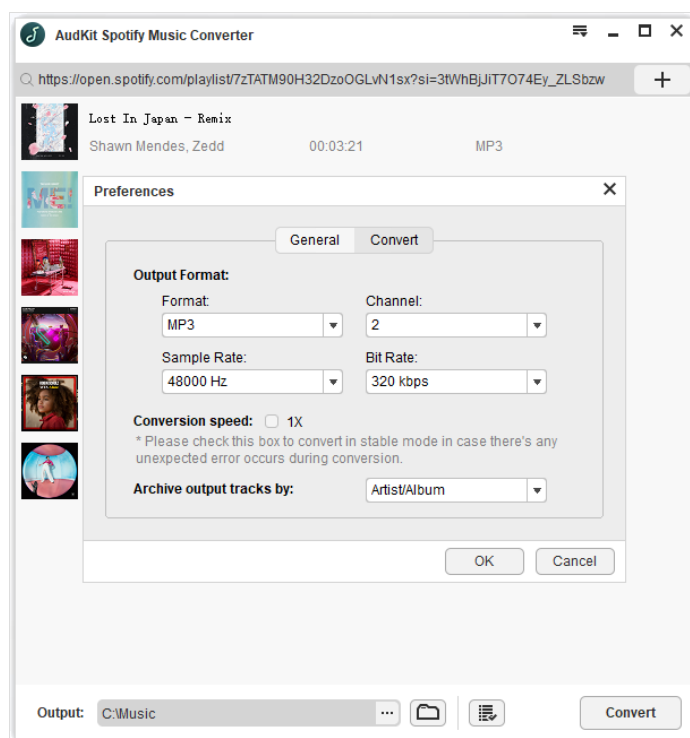

Alternatively, **copy & paste** the URL link of the Spotify playlist into the upper address bar on the AudKit tool and then tap the right **Plus** icon to load those tracks in the playlist.

Étape 3 - Change Output Format and Quality as MP3/320kbps for Spotify Playlists

Once your favorite playlists are loaded, tap the three-line **Menu** button in the top right corner of AudKit. Then choose **Preferences** from the drop-down menu and shift to the **Convert** tab on the new window.

From the window, please select **MP3** from the **Format** section and choose **320kbps** from the **Bit Rate** section. Besides, you have the opportunity to reset the sample rate and channel.

Étape 4 - Start Downloading Spotify to MP3 320kbps Songs

Once reset, hit the bottom-right **Convert** button to start the downloading process. The AudKit Spotify Downloader will download the uploaded Spotify playlists to MP3 in 320kbps at a faster 5X speed in bulk.

After downloading, you can click on the bottom **File** icon to find those downloads and listen to Spotify music offline without premium on any device or player.
