Étape 1 - Add Tidal music and playlists

Double click to launch AudFree Tidal Downloader from your computer desktop. You will see the Tidal app will be opened at the same time. Please browse the Tidal music library and find the favorite songs that you'd like to keep forever. Once found, please click the item and then tap the three-dot icon > 'Share' > 'Copy Tidal link' to copy Tidal tracks. Please paste the Tidal link to AudFree's search box. Now, hit on the '+' button to load them to AudFree for a while.

Outils

Étape 2 - Set output format and settings

AudFree Tidal Music Downloader allows you to customize output audio parameters. Click the top menu to choose the 'Preferences' > 'Convert' button to open the setting window. You can adjust output format like FLAC, WAV, AAC, M4A, MP3, etc. What's more, you can adjust bit rate, sample rate to change output audio quality. To keep high-quality Tidal music, you can set FLAC or WAV lossless format as an output format.

Étape 3 - Download Tidal music for free

You can press the big 'Convert' button at the bottom-right corner of the main window. You will see the 'Convert' will be switched to 'Cancel' mode. It means that it starts the downloading process. In general, AudFree software will run at 5X faster speed. The real conversion time depends on how many Tidal tracks added. You can locate offline Tidal music by clicking the 'file' icon. Now, you can listen to Tidal for free.
